REUSO

Complimentary components working together

The ability to mix colours and batches allows for a unique and economical installation which is kinder to the world around us. Flexibility within this collection is at the heart of creating individual interiors.

Reuso is a modular carpet tile designed to utilise every square inch produced to reduce waste.

With two options of environmentally respectful backing types, **Reuso** offers a package both inspired by, and the genuine reuse of everyday materials into new products.

Inspired by the natural beauty of aged material and it's potential to become something new again.
